PROJECT SUN STREAK (U)

ERV SESSION PROCEDURES REPORT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CONTROL NUMBER:	NICKNAME: OTHER "G"
DATE OF SESSION: 22 Aug 86	TARGET COUNTRY: UNKNOWN
REFERENCE: NONE	SESSION NUMBER: 01
DATE OF REPORT: 26 Aug 86	MISSION STATUS: Initial (continuing)
TECHNIQUE UTILIZED: ERV	SOURCE IDENTIFIER: 101

1. () TASKING: Interviewer was provided two sheets of 8 1/2 x 11 paper. On the first was written the following tasking: "Site is a compound of structures. Report activities within the following designated areas:

First floor, location #2
 Sixth floor, location #1, and #2
 Fifth floor, location #3
 Third floor, location #3
 Second floor, location #3
 First floor, location #3
 Ground floor, location #3
 Ground floor, location #1
 Sixth, 7th and 8th floors, locations #4 & #5
 Location #11

On the second sheet of paper, a rather complex outline of the target was provided indicating numbered sections corresponding to the tasking listed above. For future references a copy of the drawing is attached to this report. Additionally the Interviewer was provided with encrypted coordinates for the target site as per Extended Remote Viewing protocols, to preclude inadvertent geographic cueing. During the actual session Source was provided only the encrypted coordinates (435 800/732 260) without any further descriptive data.

2. () SESSION: Two inclemencies were known to the Interviewer which may have had an impact on the data provided by Source. The first pertains to Sources professional career. Source had waited anxiously for a medical review board to convene to determine his suitability for continued service in his profession. On 21 August 1986, the day previous to this session, Source appeared before this long awaited board proceeding only to learn that a careless administrative error on the part of a minor clerk would cause his board hearing to be delayed for another month. Although Source has not indicated any undue anxiety at this event he was irritated by the resultant inconvenience and delay. The second inclemency deals with the departure of one of Source's sons for an indeterminate period of time. The son was due to depart the day following this session, (23 August 1986) which would then begin a period of reorganization and initial anxiety within the family. Source addressed both of these issues openly and candidly and indicated he did not believe either event would adversely affect

his ability to conduct a Remote Viewing session. Source's observed hypnagogic state did not display any significant adverse manifestations which would indicate to the Interviewer that a proper Remote Viewing altered state of consciousness was not being maintained

3. () SUMMARY:

a. () (The following narrative, contained within quotation marks, is an abridged copy of Source's post-session written summary. This summary has been editorialized, (as indicated) by the undersigned, for clarity, grammar and structure. The actual unabridged summary is maintained in the mission field dossier at this location along with any other material produced during this session, e.g., (sketches, notes, etc.) "(The) site is a large odd shaped building surrounded by landscaped concrete. (There is a) man made pond of water nearby. (There are) other large buildings scattered throughout (the) area. (The odd shaped) building was designed with simple lines (but in places) it is ornate. (It is) an official building. Inside there are (many) angles (due to the odd shape). (I see) a maroon (colored) carpeted area with countertops (next to the wall). (The people) appear to be paying casual attention to (something happening in the room). (Some of) the people, both men and women, are wearing (the same style clothing) like, but not a uniform, blue blazers and blue pants or skirts. (I hear) a muted, rhythmic sound, like clack-clack, (coming) from a machine (located at) one of the counters. (There) is a feeling that one should not make much noise here (and) the people (appear) to be very serious. (In another) area of the room (there is) a moving sound (like a conveyor belt), long, padded, shiny (and located) on a raised platform connecting to a circular, raised, moving metal platform, (like the belts that deliver bags from an airplane to the passengers). (I see) another area, (teal) blue in color. (It reminds) me of a "bookie-joint." (There are) young men, in their 30s, (wearing) white shirts and no coats, in the area discussing, talking and working. Many of the men are grouped around a desk looking at something. (There are) other machine noises here. In an area just off the blue area, (colored orange) there are rows of small cubicles, (perhaps small offices). (One final area) has a group of polka dot colored chairs (or chair like objects) in a circle facing each other. In the corner of (this area) is an oblong, oval device, which is low (to the ground) and has a sliding door (or similar) opening in front. There is a cylindrical attachment on top (of this machine). The machine (reminds me) of an ice making machine (like the type found in hotels (motels), built for (very small people).

b. () During the actual session, Source reported other data which may impact on the final assessment of this target. That data is listed below in raw unevaluated form:

(1) () The "odd shaped" building has wings or building ells, like spokes on a wheel, fanning out in several directions and at various angles. The building was built to be functional as well as aesthetically pleasing and failed one both counts. An overall impression of triangles.

(2) () Associated with or near the odd shaped building is a series of structures, tall, thin, rising up, metallic, (possibly with some wood) and arranged in a systematic and orderly fashion. There is a symbolic and

official feeling about this site. It is well maintained with walkways, and landscaping in the area.

(3) () Within the "maroon area" there was a systematic noise like a sliding noise which was described as a tubular opening, perhaps a tunnel containing moveable stairs (escalator?). Throughout the building there appears to be an abundance of natural light, shaded in some areas by artificial means (blinds).

4. () OPS FEEDBACK: No feedback was available due to the absence of the operations officer on official leave. It should be noted however, that Source's general description of the building profile closely matches the, somewhat, unorthodox building profile sketch provided to the Interviewer prior to this session and attached to this report for reference purposes. It is presumed therefore in lieu of any further guidance or feedback that Source has successfully acquired the target and will continue to report on his observations at this site. Source was not told if or when he would be retargetted to this site.
